## **Economic Developments**

### **CPEC and Gilgit-Baltistan**

*Editorial, Pamir Times, November 15, 2021*

China-Pakistan economic corridor (CPEC) is a game-changer for the four provinces of Pakistan as well as for the regions of Gilgit-Baltistan (GB) and 'Azad Jammu and Kashmir' (AJK). It will become the main channel connecting both the states through transport, industry, power (electricity), promotion of trade and tourism. The people of GB have some apprehensions about the unequal distribution of rights but the government of Pakistan ensured the people of the region, that in this project they will receive equal rights like others provinces.

There are numerous benefits of CPEC for the GB region as it is the gateway for both Pakistan and China. There are some possible benefits in future for the people of the region, such as, the corridor will create job opportunities for the peoples of GB; CPEC will be significant for the peoples of GB for the optic fiber connection; under CPEC nine special economic zones will be created all over Pakistan, one of the economic zone will be for the GB region which will be constructed in Magpoondas area.

Future development is expected in the region as people are learning Chinese language and professional skills. The Karakorum highway expansion took place because of CPEC, the construction of Gilgit to Chitral Road, the establishment of the Phander hydropower project in Ghizer,

Karakoram International University and the hydropower project in Gilgit city are some of the major CPEC led benefits to the local people. Similarly, under the CPEC, the Bunji-Roundo Dam will be built. Moreover, the Diamer-Bhasha dam would produce 4800 megawatts of electricity through hydropower generation, with the total cost of the project is 14 billion US dollar. The dam will help in storing an extra 10.5 cubic kilometers of water for Pakistan that would be used for irrigation and drinking; extend the life of Tarbela Dam located downstream by 35 years, control flood damage by the River Indus downstream during high floods. In the future, it can be possible for a train service to begin between China and Pakistan, which would be vital for the GB region because the railway track will be started from China to Gilgit to Gwadar port.
